

INDESTRUCTIBLE - BUT STILL RECYCLABLE

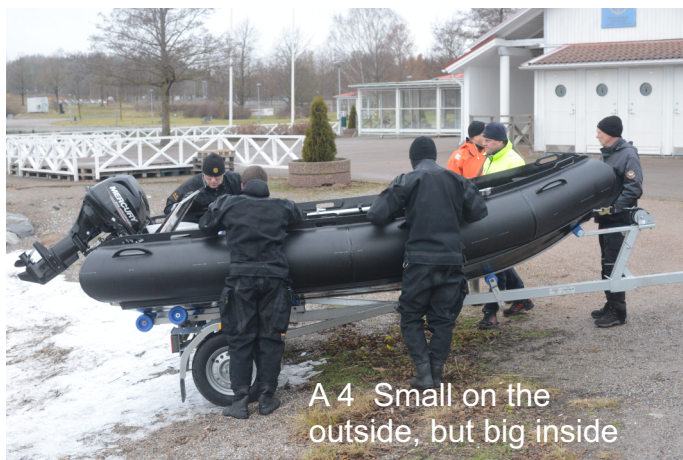

A NEW BOAT SERIES FOR PROFESSIONALS

The material used in our boats is HMWPE, High Molecular Weight Polyethylene, which is a durable polymer. The abrasion resistance of this material is superior and is suited for rough use and also for oil spill recovery. The sea keeping characteristics of our boats resemble the characteristics of RIB boats. The boat interior is spacious thanks to D-shaped fender. Unlike the RIB boat the pontoons of the RBB (Rigid Boyancy Boat) boat never loosen up or flatten, making the boat safe and resilient. The RBB boat has a very low life cycle cost compared to other boat types due to the reduced need for repair and overhaul.

Present range:

14 - 17 - 23 - 28 ft 4 - 5 - 7 - 9 meters

INDESTRUCTIBLE - AND UNSINKABLE

Steering consoles and other interior details are easy to customize to the needs of the operator. Polyethylene boats need no molds. All parts are water cut and welded.

All our boats are unsinkable, with several closed interior compartments plus plastic flotation bags where water might penetrate.

Below - our present rescue airboat range - 100 hp light airboat to carry 2 crew and 2 patients, and a 7 person 430 hp airboat. A project under development
